

RFICs and MMICs up to 44 GHz including power amplifiers, LNAs, codecs, voice and data transceivers, wireless modulators, marine AIS modulators, positive gain slope amplifiers, audio scramblers

Cable assemblies and wiring harnesses with RF, power, communication and fiber optic connectors, custom box builds

Solid-State Power Amplifier modules and systems up to 100's of kW's

Microwave/mmwave cable assemblies including precision test grade, VNA test grade, phased array grade, and formable interconnects

LNAs, DROs, and satellite grade filters

Rigid and flex waveguide, couplers, terminations, arc detectors, pressure windows, magic tees, power samplers, flange extrusions, and waveguide to coax adapters

Circulators, isolators and power combiners in waveguide and coax

PWBs, specializing in rigid-flex and long flex

mmw and microwave amplifiers, bias tees, detectors, diplexers, image reject mixers, multipliers, switches, antennas, attenuators, filters, magic tees, terminations, waveguide and cryogenic versions

Rotary joints for RF and fiber, integrated with slip rings for power and Ethernet - undersea, land, air and space versions

Aluminum transit cases: Mil-Spec and commercial for 19" & 9.5" racks, Li-ion batteries, hazardous materials, clean rooms, drones, optics, EMI protection, munitions, satcom, communications, etc...
